

KEVIN HERNANDEZ

Centreville, VA | kjh77966@gmail.com

Full Stack Engineer with 6+ years building Python APIs, containerized microservices, and enterprise web applications across JavaScript and TypeScript stacks. Delivered systems serving 3 distribution facilities and internal platforms; led code reviews for teams of 5; and maintained ~90% backend test coverage.

WORK EXPERIENCE

Full Stack Engineer

Aug 2025 - Present

USAI, Rockville, MD

- Engineered agentic AI applications and microservices in a Kubernetes environment, supporting scalable backend workflows.
- Architected AngularJS and ExpressJS application modules, producing architectural diagrams and leading code reviews for a team of 5 developers.
- Deployed and managed Kubernetes clusters across 3 environments (dev, staging, production), enabling consistent container orchestration for the platform.

Backend Engineer

Apr 2024 - Aug 2025

Rising Tide, Richmond, VA

- Built and maintained production microservices and REST APIs using Python and FastAPI, serving internal tools and 3 client-facing platforms.
- Optimized MySQL and MariaDB schemas and queries, reducing slow query response times by 35% and improving backend reliability.
- Containerized services with Docker and orchestrated deployments through Kubernetes, cutting environment setup time by roughly 50%.
- Automated CI/CD pipelines in GitHub Actions, reducing deployment and automated testing time from 30 minutes to under 10 minutes per release.
- Authored PyTest suites and enforced test automation, maintaining 90% code coverage across the backend codebase.

Full Stack Engineer

Oct 2019 - Apr 2024

Hub Group, Chantilly, VA

- Shipped Vue.js warehouse applications that increased throughput by 40% across 3 distribution facilities.
- Developed and maintained enterprise applications backed by DB2, supporting logistics and operations teams across the organization.
- Mentored 3 junior developers through code reviews and pair programming, improving team delivery consistency.
- Reduced production bug backlog by 25% while delivering features on a 2-week sprint cadence.

Full Stack Engineer

Jan 2019 - Feb 2021

ActivePrime, Mountain View, CA

- Maintained Python and Flask backend systems supporting client CRM platforms used by enterprise accounts.
- Delivered Vue.js CRM applications for 5+ clients, improving data visibility and user workflow

efficiency.

- Automated data quality workflows, reducing manual cleanup tasks by approximately 15 hours per week.

PROJECTS

Applications for the San Antonio Spurs Basketball Team

San Antonio Spurs

- Built several applications for the San Antonio Spurs Basketball team, supporting team operations and business workflows.

TECHNICAL SKILLS

- Languages: Python, TypeScript, JavaScript, SQL, PHP, HTML/CSS
- Backend & APIs: FastAPI, Flask, Node.js, Express, REST APIs, Microservices
- Frontend: AngularJS, React, Vue.js
- DevOps: Docker, Kubernetes, GitHub Actions, CI/CD, Linux, NGINX
- Databases: MySQL, MariaDB, IBM DB2, MongoDB
- Testing: PyTest, Unit Testing, Test Automation
- Practices: Agile Development, Secure Development, Production Debugging, Root-Cause Analysis
